USING ATTITUDINAL SEGMENTATION TO IMPROVE YOUR SALES AND MARKETING WIN RATE

Steve Mann
steve@ablebrains.com
July 2010
The best way to understand the power of Attitudinal Segmentation is by looking at an actual example of an implementation of such a strategy.

This segmentation approach was performed for a high tech company and includes (I) identifying unique buying styles, (II) drivers of demand for their services and (III) recommendations for how to personalize the buying experience to increase win rates.
### Typical Market Segmentations

#### Solution: What you sell

1. **Solution:** What you sell

#### Geography: Where you sell

2. **Geography:** Where you sell

#### Industry: How you sell

3. **Industry:** How you sell

#### Company Size: What are the coverage rules

4. **Company Size:** What are the coverage rules

---

**Large Business Technology Market**

- **Product 1**
- **Product 2**
- **Product 3**
- **Product 4**

**Geography**

- Americas
- Asia & Japan
- EMEA
- ANZ

**Company Size**

- Large
- Upper Mid-Market
- Lower Mid-Market
- Small

**Industry**

- Auto, High Tech, Banking, Insurance etc...

---

**But how do consumers actually learn about and buy high tech products?**

*Wednesday, July 14, 2010*
WHY CHANGE?

Customers  

Market  

Competition  

Your Org.

Today’s market characteristics:
- Market growth is deteriorating
- Margins are falling
- Vendor consolidation
  - market power shifted from suppliers to buyers

The Fundamental Question: How can your organization continue to grow?

1. Increase Share-of-Wallet in the installed base
2. Attract customers from the competition
3. Outpace the competition in the development of new markets, technology, partner mgmt. etc.

- Focus on customer's needs, attitudes & behaviors toward buying technology is key for the future success of the company, especially in light of a changing market environment
- Organizations need a better way to identify “high return” customers, de-prioritize low return ones and develop targeted ways to talk to them which resonates with how they buy
- Attitudinal segmentation does all this
### Examples of Successful Uses of Behavior-Based Segmentation

<table>
<thead>
<tr>
<th>Example</th>
<th>Market</th>
<th>Approach</th>
<th>Outcome</th>
</tr>
</thead>
</table>
| DELL    | Enterprise business | Dell allocates resources and account teams to attractive B2B segments, based on a behavioral view of the customer.                                                                                      | Successful demand generation in a volume business  
• Unprofitable and misaligned segments de-prioritized (focus where Dell value prop valued)  
• Differential service levels & marketing for Enterprise customers based on unique segments |
| APPLE   | Business users | Apple segmented customers according to needs / behaviors, identifying a previously underserved group to create the desktop publishing market.                                                    | Market leadership & definition of new market  
Locked up key partnership with Adobe, focused company on target segments and achieved ~80% share of desktop publishing market |
| MICROSOFT | Enterprise developers | Microsoft identified developer segments based on their wants, needs, and career motivations.                                                                                                           | Market success in Enterprise largely attributed to developer ties and their resultant Microsoft advocacy |

THE BENEFITS OF SCIENTIFIC, BEHAVIOR-BASED APPROACH

Benefits of this Approach

- Identified most attractive customers for the firm to target across traditional segmentation dimensions
- De-prioritized low probability prospects
- Improved Win-Rate by enabling firm to craft messaging & branding specific to what a particular consumer cares about -- talking in their language about their concerns
- Improved return on demand generation investments
- Helped focus product/ offer development to the needs of targeted customer sets
- Can be applied quickly using simple set of questions to identify most attractive customers

Segmentation based on customer:
- Needs
- Attitudes
- Behaviors

Behavior-based approach adds a segmentation dimension that was missing in the view of the market. It helps organizations to extend market leadership both in an efficient and effective way.

### Sample High-Tech Market Segments

<table>
<thead>
<tr>
<th>Description</th>
<th>Technology enabled innovators</th>
<th>ROI motivated spenders</th>
<th>Packaged app configurators</th>
<th>Legacy constrained</th>
<th>Risk averse</th>
<th>Business laggards</th>
<th>Emerging companies</th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ Use IT for competitive advantage ▪ Driving rapid change in business environment ▪ Want Web Services ▪ Heavy IT involvement in business ▪ Don’t do a lot of custom work ▪ Open to the Brand</td>
<td>▪ Heavy focus on detailed ROI analysis for all purchases ▪ Big spenders when the return is there ▪ Open to the Brand</td>
<td>▪ Strongly prefer packaged applications over custom development ▪ Suite-oriented; want a relationship with SW vendor ▪ Open to the Brand</td>
<td>▪ Companies that are interested in leading edge technology, but are constrained by a lack of skills or their legacy systems</td>
<td>▪ Want a solution others in the industry are using ▪ IT not involved in business decisions ▪ Slow, incremental change to business platform</td>
<td>▪ Falling behind their industry but no drive to change ▪ Regard IT as a necessary evil</td>
<td>▪ Smaller, younger companies—often in emerging markets—that are building out their business and their IT capabilities</td>
<td></td>
</tr>
</tbody>
</table>

► Through customer and prospect surveys we uncovered 7 distinct behavior-based customer segments that cut across industry, geography, and company size
### SAMPLE OUTPUT FOR HOW CUSTOMERS BUY TECHNOLOGY

<table>
<thead>
<tr>
<th>Description</th>
<th>Technology enabled innovators</th>
<th>ROI motivated spenders</th>
<th>Packaged app configurators</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Use IT for competitive advantage</td>
<td>Heavy focus on detailed ROI analysis for all purchases</td>
<td>Strongly prefer packaged applications over custom development</td>
</tr>
<tr>
<td></td>
<td>Driving rapid change in business process platform and IT environment</td>
<td>Big spenders when the return is there</td>
<td>Suite-oriented; want a relationship with vendor</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Demand Drivers</th>
<th>Technology enabled innovators</th>
<th>ROI motivated spenders</th>
<th>Packaged app configurators</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Want web services enabled solution but less interested in having an SOA platform provided by application vendor</td>
<td>Want web services enabled solutions</td>
<td>Interest in SOA similar to average demand profile</td>
</tr>
<tr>
<td></td>
<td>Open to brand</td>
<td>Openness to the brand – Avg in MM. Marginal below in enterprise</td>
<td>Open to Brand</td>
</tr>
<tr>
<td></td>
<td>Lower price elasticity</td>
<td>Avg price elasticity; deployment time more sensitive than price</td>
<td>Average price elasticity</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Key influencers</th>
<th>Technology enabled innovators</th>
<th>ROI motivated spenders</th>
<th>Packaged app configurators</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>IT technical staff for support solutions</td>
<td>IT staff for support solutions</td>
<td>IT staff for support solutions</td>
</tr>
<tr>
<td></td>
<td>CIO/CTO for competitive solutions</td>
<td>LOB owner for competitive solutions</td>
<td>CEO/LOB for competitive solutions</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Channel preferences</th>
<th>Technology enabled innovators</th>
<th>ROI motivated spenders</th>
<th>Packaged app configurators</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Mixed in Enterprise</td>
<td>Majority (70%) prefer direct through vendor in Enterprise</td>
<td>Majority (66%) prefer direct from vendor for Enterprise</td>
</tr>
<tr>
<td></td>
<td>Majority (64%) prefer direct from vendor for Mid-market</td>
<td>Mixed in Mid-market</td>
<td>Mix of direct and indirect in Mid-market</td>
</tr>
</tbody>
</table>

This segmentation enables firms to uncover the distinct buying style of a firm, what drives their individual demand for your services, who influences the purchase decision and what business processes are important to them and which channel they care to use. YOU can exploit this knowledge to drive demand for your products and services.
SEGMENTATION ENABLES YOU TO PERSONALIZE MESSAGING, OFFERS AND CARE POINTS

<table>
<thead>
<tr>
<th>Positioning</th>
<th>Leverage core through Ecosystem</th>
<th>What about Emerging Companies</th>
<th>Opportunistic</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tech enabled innovators</td>
<td>ROI-motivated spenders</td>
<td>Packaged App Configurators</td>
<td>Emerging companies</td>
</tr>
</tbody>
</table>
| ■ Refine Messaging:  
  ■ Target LOB influencers for differentiating processes  
  ■ Emphasize deployment modularity  
  ■ Where appropriate, emphasize widespread industry use | ■ Emphasize “integrated but configurable” message  
  ■ To increase demand for long term, focus product investment on:  
  ■ Shortening deployment times  
  ■ Tighter integration with desktop apps | ■ Emerging companies have low spend today, but represent highest growth markets:  
  ■ Increase China Coverage  
  ■ Focus by industry to create industry-wide business platform momentum | ■ De-Prioritize these customer groups and Focus marketing and sales efforts on other high priority segments  
  ■ Consider program for hosted offers for legacy constrained in longer term |
| ■ Emphasize market leading technology and SOA vision:  
  ■ Leverage relationships with senior IT staff (CIO/CTO)  
  ■ ROI motivated & Tech enabled: emphasize ability to offer Web services  
  ■ Build-out and deploy Value Engineering tools:  
  ■ Continue to build team to cover smaller deals in MM (e.g., $500K deals) | ■ Target LOB influencers for differentiating processes, particularly CEO  
  ■ Stress integration with desktop apps  
  ■ Emphasize built in best practices to mid-market | ■ For Emerging companies, emphasize market leading technology, SOA vision, and help ‘getting it right first time’:  
  ■ Emphasize simpler, faster, lower-risk implementation  
  ■ Target LOB C-level influencers for differentiating processes | ■ Sales force may continue to pursue these targets opportunistically, but Marketing resources will be directed at higher priority prospects |

## Sample Segment Specific GTM Strategies

<table>
<thead>
<tr>
<th>Position as a business value innovator</th>
<th>Leverage strengths through ecosystem</th>
<th>Business platform for emerging countries</th>
<th>Opportunistic</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tech enabled innovators</td>
<td>Packaged App Configurators</td>
<td>Emerging companies (commonly found in emerging markets)</td>
<td>Legacy Constrained Legacy Laggards Risk Averse</td>
</tr>
<tr>
<td>Partner with leading business innovator customers to drive adoption and create leading scenarios for bus value creation</td>
<td>Create expert configuration skills and capacity in multiple channels and routes to market</td>
<td>Emphasize market leading technology, vision, and help “getting it right first time”—Low spend today, but highest growth markets</td>
<td>Local opportunity identification and opportunity management</td>
</tr>
<tr>
<td>Build-out / Deploy value-proving tools to translate into proof of business value</td>
<td>Drive best practices through the ecosystem; Create/expand partner ecosystem to attract mid-market prospects</td>
<td>Focus on selected industries to create industry-wide business platform momentum and value prop</td>
<td>Not a strategic focus now, therefore no marketing investment</td>
</tr>
<tr>
<td>Important market for Enterprise; draws in same segments within mid-market</td>
<td>Potential to attract Risk Averse segment through offer refinement</td>
<td>Combo of on and off—premise delivery</td>
<td>Low spend, large number of companies, need processes to ensure the firm avoids wasted sales effort due to wide-spread brand appeal</td>
</tr>
</tbody>
</table>
Segment membership is predicted by utilizing either Tele-marketing or a Web-Based Tool where customers are walked thru a short question tree. Doing this in an entertaining fashion mitigates tool abandonment.

1. Score companies based on publicly available data (firmographics)
2. Used tele-center or Web-based tool to get additional attitudinal data
3. Attitudinal data plus firmographics improves predictive accuracy to >75%

The web-based tool helps firms to target the right prospects in the right way, utilizing segment-specific positioning and sales approaches.

### Tool enables you to...

1. Create an optimal sales approach based on the knowledge of segment-specific needs, attitudes and behaviors within an industry and company size
   - On-point sales messages
   - Personalized Web experiences and messages based on segment membership
   - Improved “viral” passing of information from sneezer to recipient.
2. Target the most important internal influencers by segment and type of business process they care about
   - Elevated importance of CFO in Legacy constrained firms
   - Greater emphasis on LOB influencers for core processes; greater emphasis on IT influencers for context processes
3. Utilize price elasticity insights to understand where competitive negotiations can be overcome by moving non-price variables
4. Identify business processes that are most important by target segment
5. For Mid-market, allocate leads to partners best equipped to address priority customer needs, wants and buying style
...AND DETERMINE WHICH SEGMENTS ARE LIKELY TO YIELD A HIGH RETURN AND WHICH ONES YOU SHOULD DE-PRIORITIZE

81% of the spend, 56% of companies

<table>
<thead>
<tr>
<th>Technology enabled innovators</th>

HOW CAN ABLEBRAINS HELP YOU?

• We identify which buying style segments contain the most attractive customers for you to target regardless of industry, geography or company size.

• We will help you improve your Win-Rate by enabling your firm to craft messages specific to a customer’s attitudinal “care points” - content and messaging specific to their buying style.

• We will improve your return on demand generation investments by increasing your conversion rates.

• Focus product/offer development to the needs of targeted customer sets.

• Apply attitudinal segmentation quickly using simple set of questions to identify most attractive customers.
